

Why NetDimensions Learning

Quick To Implement • *Lower overall costs*

NetDimensions Learning can be deployed faster and with fewer implementation services than almost any other learning system in the market. The difference: deployment in weeks versus months.

Security • *Best in class*

NetDimensions Learning's security is based on a transaction server model, where all Internet requests are treated as individually controllable and auditable transactions that must pass through a security module before being processed by backend business components.

On Premise or SaaS • *Suited to your deployment needs*

Clients have the option to deploy NetDimensions Learning behind their firewall or choose a SaaS subscription through NetDimensions' ISO 27001 certified hosted and managed services.

Highly Scalable • *Grow as you grow*

NetDimensions Learning can scale to very large numbers. Our current tests have shown upwards of 500,000 users and more than 100,000 concurrent users.

Ease-of-Use • *Only adjustable interface*

Every vendor claims this, but often fails in delivery. The NetDimensions Learning user interface is dynamically adjustable, as the screen is built at the outset, based on the customer's organizational structure, preference settings, skin properties, language choice, and system configuration.

Global • *Multiple language handling*

NetDimensions Learning was designed from the ground up to be language neutral, hence it is able to support many languages simultaneously, selectable by the user at any time, on the same instance.

Market-Leading Functionality • *Mobile, social, compliance*

NetDimensions Learning comes with inherent capabilities for mobile learning (including mEKP, an innovative portable learning environment that requires no installation or connectivity), social collaboration (including an integration with best-in-class Confluence Wiki), compliance (including support for CFR 21 part 11), and extended enterprise management.

Open • *The NetDimensions SDK*

The NetDimensions SDK (Software Development Kit) is a set of development tools and interfaces that enables organizations to easily and securely integrate learning management functionality into websites, portals, external applications, and mobile devices.

Integrated & Practical • *The NetDimensions Talent Suite*

NetDimensions Learning is part of the NetDimensions Talent Suite providing clients with a fully integrated approach to support an innovative model of ongoing learning, talent, and performance management.

In today's fast-paced business environment, companies are challenged to adopt and respond to new business and compliance requirements more quickly than ever before. New technologies have opened up and are able to provide learners with other means of learning than the traditional environment. Learning today is integrated into all aspects of the business both in a formal and informal way.

At the core of the NetDimensions Talent Suite, **NetDimensions Learning** includes all the functionality you need to implement, manage, and execute enterprise learning programs. Whether you are based in one location or have employees around the globe, NetDimensions Learning supports the most languages than any other LMS on the market.

NetDimensions Learning has all the tools to enable you to manage training programs, compliance initiatives, licensing and certification requirements, competencies, and collaborative learning, as well as external training for the extended enterprise.

Quick to implement, reliable, robust, secure and easy to use, NetDimensions Learning enables organizations to transform the entire learning and development process, as well as offer a highly personalized learning environment with individual development plans, competencies, licenses, and certifications.

Organizations around the world have implemented NetDimensions Learning for:

- Classroom & Online Training
- Content / Documentation Management
- Assessments & Regulatory Compliance
- Certification & Licensing Programs
- Human Resource Management
- eCommerce Management
- Extended Enterprise Training
- Franchise Management

Key Features of NetDimensions Learning:

Flexible and Configurable UI

NetDimensions Learning's user interface provides drop-down menus, which make it very easy for users to navigate the site and customize it to suit their needs. Course listings provide all the necessary information about the courses, including graphical progress bars for each enrolled course, and exam status icons for courses that include exams or course evaluations. Launching a course is always just one click away.

Catalog Search

The Catalog Search allows maximized flexibility and sophistication in organizing and managing extensive content. Organizations have the option to display course catalogs in a graphical or hierarchical tree-oriented structure and to sort them into different columns.

Mobile Learning

mEKP is an end-user version of NetDimensions Learning, running independently from a flash drive. No installation or Internet connection required. mEKP boasts features including on-the-fly content encryption, downloading of tagged content, and two-way synchronization to download FULL training history, including courses unavailable offline.

Learning Path

The Learning Path display functionality presents a graphical layout of a user's training plans, courses, and learning objects. It enables users to easily see items that have been completed, in process or need action.

Composite Programs

"Programs in Programs" allow the selection of learning program sessions within learning program sessions. This allows administrators and learners to follow specific paths or optional paths. An excellent use case is when learners have to follow a specific path to gain a certification or achieve compliance.

User Groups

User Groups enable arbitrary groups of users, possibly spanning different organizations to be set-up in NetDimensions Learning. This feature saves an administrator a lot of time by having the ability to create user groups and then enroll users by group or via auto enrollment.

Widgets for easier Customization

A multitude of charts and other widgets provide the home page with more options for dynamically displaying different kinds of information. This makes it much easier for and convenient for users to customize their home page.

Quick Polls

Quick Polls allow a survey to be attached to a news article that is delivered through the home page. The poll result is displayed graphically to users who have answered the survey. This provides a quick and easy way for administrators and managers to gather information about certain topics.

21 CFR Part 11 Validation

NetDimensions Learning has been validated for use in 21 CFR Part 11 compliance programs. Organizations that must comply with FDA regulations can be confident that they can use our system to successfully complete their 21 CFR Part 11 certification. Organizations in other industries can also use the e-signatures feature of NetDimensions Learning to establish a detailed audit trail for compliance-related reports.

JavaScript SCORM API Adapter

This feature allows SCORM courses to run without a Java Runtime Environment (JRE) installed, making it possible to run courses on iPhones and iPads, as well as Android and Blackberry devices. The API Adapter removes the need to have Java installed on learner's computers and saves administrative and learner time.

Class Schedule Planning User Interface

A new and improved interface for class schedule planning enables instructors to add or update details of a sub session, e.g. facilities, instructors or resource availability. This is a great time-saving function that allows instructors to schedule classrooms, resources (whiteboards), and rooms within a single window.

Enhanced Confluence Wiki Integration

Users can create Confluence Wiki spaces for new courses from within NetDimensions Learning and grant user permissions for the appropriate space when they enroll in a course, as well as revoke permissions when they withdraw. This addition makes it easier for learners to get to the relevant wiki spaces for courses and additional materials instead of logging into Confluence separately.

Approval Delegation

Managers and administrators can delegate approval authority to other users for a specified period of time. This works for both internal and external approvals, allowing another person to be delegated to approve users other than those that report to them and streamlines the approval process where normally there is just a single approver.

Plug-ins for 3rd Party Content Platforms

NetDimensions Learning's plug-ins enable clients to display content from the system -- including the latest courses, enrollments, news, training plans, and certifications -- on platforms such as:

- Google apps (via gadgets in iGoogle, Gmail, Google calendar)
- Wordpress sites (via widgets/plugin-ins)
- Webex, Adobe Connect
- Confluence Wiki (via plug-ins/macros)

Software Development Kit

The NetDimensions Software Development Kit (SDK) is a set of development tools that enables users of the NetDimensions Talent Suite to integrate learning, knowledge and performance management functionality into websites or portal sites and to exchange data between the NetDimensions Talent Suite and external applications (such social platforms and HR systems) or mobile devices (such as smartphones or tablets).

Dashboard

Dashboard views give administrators and managers an overview of the progress of training, assessments or compliance programs by displaying graphical charts that make it easy to identify deficiencies.

These are only some of the powerful features of NetDimensions Learning that is designed to help you achieve cost savings, educate extended enterprise value chains (supplier, partner and consumer), improve workforce productivity, and maintain staff and agent compliance with various regulatory requirements.

Smartphone Optimized UI

NetDimensions Learning's mobile UI enables users with smartphones to gain access to the overview of their courses and records, or search for learning items. When navigating to the system website using smartphones, users will automatically be directed to the new optimized login page for smartphones. Once logged in, users will be able to view details of their enrolled course listings, records of transcripts, and perform catalog search. From the list of enrolled courses, users can choose to launch the course, find out more information relating to the course, or view their transcripts.

Exam Engine

NetDimensions Exams is a robust, sophisticated exam authoring and delivery environment. Originally developed to meet the demanding requirements of highly regulated industries, this exam engine enables exams to be treated and delivered as learning objects. NetDimensions Exams is available as a standalone enterprise assessment solution or as part of NetDimensions Learning.

Easy-to-use Report Wizard

Collapsible Sections, Grouping, Drag and Drop ordering are just a few of the features that make it quick and easy to generate reports in NetDimensions Learning.

Contact us today to find out how NetDimensions Learning can simplify the management of your organizations' performance, knowledge and learning initiatives.
